SUMMARY

Unity developer with 6 years building and shipping live mobile and WebGL games in C# at Varisoft studio. Principal client engineer on MyWorld, a social life-simulation MMO — the #1 contributor by commits across 5+ years among a team of ~30. Experienced across gameplay systems, real-time multiplayer (Nakama), live-ops event delivery, economy and IAP systems, Spine 2D avatar pipelines, and Unity Addressables. Comfortable owning a full project as sole programmer or leading a system on a large team.

SKILLS

Engine & Language: Unity (2019–Unity 6, URP), C#, UniTask (async/await), coroutines
Animation: Spine 2D — runtime skin remapping, atlas compositing, action-tool attachment, functional cosmetics
Asset Delivery: Unity Addressables — group management, preloading, download-size optimization
Backends & Services: Nakama (real-time multiplayer, RPC, sockets), Firebase (Crashlytics, Analytics, Remote Config), PlayFab, Unity IAP (UGS 5.x)
Auth & Platforms: Google / Facebook / Apple Sign-In, Huawei HMS; Android, iOS, WebGL, Huawei AppGallery
Design Patterns: Singleton, State Machine, Observer, Object Pooling
Tools: Git, GitHub, Visual Studio, Google Sheets data pipeline, Claude Code (AI-assisted development via Unity-MCP)

EXPERIENCE

- Varisoft Co., Ltd. — Unity Game Developer** Bangkok, Thailand | Aug 2020 – Present
- Principal client engineer on MyWorld, a social life-simulation MMO (Android / iOS) — authored 8,400+ of 21,700 total commits over 5 years, #1 contributor among ~30; owned gameplay, housing and world-building, live-ops seasonal events, economy (shop, gacha, crafting, auction), social features (chat, clubs, marriage), and Nakama + Firebase integration
 - Built MwAvatarEditor and FurnitureTestTool — standalone Unity editor tools for avatar QA and housing-grid content validation, used by the art and design team
 - Developed core systems on Dream Runner X (Feb 2026 – present): mail (full data/state/view layer), shop + IAP stack (UGS IAP 5.x), gachapon subscene with summoning animation, daily reward board, and lobby/room management — 832 commits
 - Contributed to Pakapow RPG — built the guild application and alert system on PlayFab Groups API, battle UI improvements, and SDK/build maintenance
 - Sole programmer on Cat vs Aliens, shipped to Huawei AppGallery — integrating Huawei HMS (sign-in, achievements, leaderboards, banner ads)
 - Built Rescue Meow Meow for Thai PBS Kids (WebGL) — physics-based puzzle with Firebase Cloud Functions backend (leaderboard, cloud save) and Thai PBS account integration via WebGL JS-interop

SELECTED PROJECTS

MyWorld — Social life-simulation MMO, Android / iOS; avatar customization, housing, careers, mini-games, seasonal events, and real-time social features. Lead engineer across the full 5-year run.

Dream Runner X — Online runner, Android / iOS; mail, shop + IAP (UGS 5.x), gachapon with summoning scene, daily reward, and lobby systems (Feb – Jun 2026).

One Pro Shoot — Branded promotional WebGL shoot-'em-up; sole programmer — Spine 2D princess avatar, pooled bullets and enemies, Firebase leaderboard.

Fishing Town — Blockchain P2E fishing RPG (WebGL); rod enhancement UI with per-rarity stat preview, repair countdown system, and inventory sorting — delivered in a 5-day sprint.

Mascot Design Tool — Freelance Unity desktop app; Spine 4.0 mascot creator with per-slot color tinting, custom image import, bone-scale sliders, and PNG / JPG export via offscreen RenderTexture (2021).

EDUCATION

Chiang Mai University
B.Eng. Computer Engineering
2016 – 2020

LANGUAGES

Thai (native)
English (professional reading & writing; basic spoken)
